>> Describe the PLAYGROUND:

>> WHERE is it?

>> What's the NAME of the school?

Not all schools are about reading, writing and arithmetic. There's a small rural school in Uruguay, South America, where lessons include **milking cows**. You are required to learn **Tai Chi** or **Kung Fu** as part of your core education in parts of China. In Iceland all children learn **knitting**. And in Bashkiria in Russia - a region famous for its delicious honey - many of the schools teach **beekeeping**.
